ARC LIGHT

The Arc Light is designed to alert pedestrians of the rear end swing of the forklift. Multiple light configurations can be used for increased visibility and to keep pedestrians away from both the front and back of the forklift or to create a halo around the truck. Each Arc Light includes hardware and mounting bracket for easy installation in a variety of configurations.

Specifications:

- 9 - 64V Operating Voltage, 21W (7 x 3W LEDs)
- 100,000 hour lifespan with 2 year warranty
- Polycarbonate Lens
- CE Rated
- Waterproof IP67 rated

Installation and Configuration Options:

- Single light, small arc configuration directly on back of overhead guard
- Double light, large arc configuration on back corners of overhead guard
- Double light, (2) side arc configuration on each side of the forklift
- Triple light, single small arc directly on back and (2) side arcs on each side of the forklift
- Quad light, halo configuration on all (4) corners of the overhead guard
